

## Drupal Developer with 10 Years of Experience

### TECHNICAL KNOWLEDGE

Web Technologies :Drupal 8.x and Drupal 7.x, Drupal 6.x, PHP, HTML, JavaScript, AJAX, jQuery, CSS, RWD, AWS, Web Services, Github, Composer, Drush, SEO, Cache, Search Engines etc.

Operating Systems :Linux

RDBMS : MYSQL

### PROFESSIONAL QUALIFICATION :-

B. Tech (Information Technology)

### PROJECT DETAILS :-

**Project Name** : **Music Redemption System.**

**Team Size** : **5**

**Technical Environment** :**PHP, Smarty Templates and MySQL.**

**Project Description** : Live Nation is a ticket master, whose tickets are sold to their customers along with the unique codes for the redemption of music albums either by physical CDs or by digital downloads through the Music Redemption System (MRS). Each code can be redeemed only once. Such codes are sent through the emails containing the link, restricting the valid users to redeem their music album either by physical or digital. The physical and digital redemption differs in cost. MRS has the consumer flow (front end for the redemption of music albums by end users) and admin flow (back end to customize the contents of consumer flow and to customize the new music album release through bundle creation and bundle management)

**Responsibilities:** Involved in the development of almost all the modules of consumer flow and in admin, developed modules such as customer service, create and export codes, preview bundle, Export unredeemed logs , involved in the development of some sub-modules in add/edit bundle such as footer management and digital variant support etc.

**Project Name** : MRS Enhancements.  
**Team Size** : 3  
**Technical Environment** :PHP, Smarty Templates and MySQL.

**Project Description** : Enhancements in Music Redemption System (MRS) such as adding digital variants through admin (backend) and change the consumer flow according to the no of variants present display the redemption status in admin-customer service and bundle stats to calculate the redemption status for respective bundles. Enhancements in Music Redemption System (Version 2) such as sending redemption orders via MusicToDay API, Validating the user address by QAS validation, encrypted address in URL is decrypted and validated by QAS validation, which depends on consumer flow. Add/edit bundle in admin supports unlimited use codes for multiple download purpose.

**Responsibilities** : Involved in all enhancement modules except the bundle stats module.

**Project Name** : AdvanstarWebforms.  
**Team Size** : 3

**Technical Environment** :Drupal 7.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** : AdvanstarWebforms is a web based application which allows its end-users to create webforms depending on their requirements. After creating the webform, its embedded code tab is available where the respective embedded codes can be copied to clipboard.Pasting such embedded code in end user's website will rend the respective pre-created web form from AdvanstarWebforms. All data submissions are handled by AdvanstarWebforms. This allows their users to bulk export the web form submissions done in their respective websites. Thus maintains all data submissions.

**Responsibilities** : Involved in all modules except copy to clipboard functionality.

**Project Name** : Modern Medicine Redesign.  
**Team Size** :5

**Technical Environment** :Drupal 6.x, HTML, JavaScript, AJAX, jQuery, CSS

Project Description: Involves creation of custom theme for site redesign and many enhancements tickets which include various content jcarousels, archives, Twitter API v1.1 migration for importing twitter feeds and apache solr search functionalities.

**Responsibilities** : Involved in the implementation of above mentioned functionalities.

**Project Name** : DVM360.

**Team Size** : 5

**Technical Environment** : Drupal commerce kickstart 7.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** : This project is development of e-commerce site in Drupal 7.x using Commerce Kickstart distribution package and worked in creating reports for normal users and administrators using Views and Cron. Implemented various use cases in cron using PHP code. Generated ".csv" reports based on date range and also based on conditions. Developed the architecture and conceptualization of creating reports and implemented the same successfully.

**Responsibilities** : Successfully achieved this report to mail functionality with minimized custom code.

**Project Name** : Comikaze Expo.

**Team Size** : 3

**Technical Environment** : Drupal 7.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** : This project is building a site that provides latest information and details for an end of the year event. The site was built using Drupal 7.x using DS and Views. Based on the requirements various content types were created and the display of those content types were managed using DS and Views without coding. Features like Slideshow, feeds from Facebook and Twitter, streaming videos were implemented. The site was completed in short span of one month with required functionalities.

**Responsibilities** : Involved in all functionalities.

**Project Name** : Blogs.

**Team Size** : 3

**Technical Environment** : Drupal 7.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :Blogs were related to Authors and Tags related taxonomy terms. Features like Blogs Archive, TagCloud, Related articles were implemented Social links were used to follow Author and share/like Blogs in Facebook, Twitter and LinkedIn.  
**Responsibilities** :Partly involved in all functionalities.  
**Project Name** : International Motorcycle Shows.

**Team Size** : 3

**Technical Environment** :Drupal 7.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :This project involves the development of Drupal 7.x site similar to an existing Drupal 6.x site with new enhancements/modifications. Configure the site using DS, Views and built modules with minimum custom coding.  
**Responsibilities** :Involved in all functionalities.

**Project Name** : Dental Reports.

**Team Size** : 3

**Technical Environment** :Drupal 7.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description:**This project involves enhancement and addition of new functionalities to a dental site, which involves implementing slideshow feature to existing content type without affecting other functionalities. Slideshow was implemented using Multigroups and Views Slideshow module for Drupal 6.x.

**Responsibilities** :Implemented the multigroup slideshow as requested.

**Project Name** :Pass The Ase.

**Team Size** : 3

**Technical Environment** :Drupal 7.x using Commerce Kickstart distribution package

**Project Description** :This is an already existing site in Drupal 7.x and it involves maintenance activities like issue fixing and development of new functionalities/enhancements such as

- The site provides learning materials for passing the Automotive Service Excellence (ASE) test

- Facilities like 'Add to Cart' and 'Tax Exempt' are available

**Responsibilities** :Involved and successfully completed extensive investigation of various features in already existing code which was really challenging.

**Project Name** : Licensing Expo.

**Team Size** : 3

**Technical Environment** :Drupal 6.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :This project involves providing latest information in Licensing and Branding of productsThe project was developed using Drupal 6.x with formatters and code fields in DS.

**Responsibilities** :Involved in bug fixing and enhancements.

**Project Name** : Mobile SAP.

**Team Size** :4

**Technical Environment** :Drupal 6.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :This project is a mobile version of "Search Auto Parts",which involves providing latest information for various Auto Partsindustries and training manuals for vehicle industry professionals.

**Responsibilities** :Involved in theme customization using CSS3 media queries (responsive layouts) without affecting existing desktop site. Successfully achieved the mobile layouts with minimal code and met aggressive timeline.

**Project Name** : NBA Turner.

**Team Size** :16

**Technical Environment** :Drupal 7.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :NBA Turner is a famous basketball championship held in US every year. This contains 28 teams and each team has its own official site under different domains. This project is a Drupal 7 version of Drupal 6 legacy system.

**Responsibilities** :Played the role of team coordinator and provided technical support to the team members to solve issues and styles.

**Project Name** : **Accela.**

**Team Size** :3

**Technical Environment** :Core JAVA, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :Accela is an online video tutorial system and this is an enhancement project. Uploading video and viewing in HTML5 player.

**Responsibilities** :Played the role of UI and video validation. This project involved the investigation on the existing system.

**Project Name** : **Pharma.**

**Team Size** :3

**Technical Environment** :Drupal 6.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :This project involves enhancement and addition of new functionalities which involves implementing PDF to solr server using apache TIKA, domain based solr search, location IP based URL redirection, domain specific polls, generate path for SEO URLs.

**Responsibilities** :Involved in the implementation of above mentioned functionalities.

**Project Name** : **Dental.**

**Team Size** :3

**Technical Environment** :Drupal 6.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :This project is a development project and involves implementation of solr search, Twitter API integration, alfresco CDN, APC, contexts etc. Migration of Drupal data from legacy site.

**Responsibilities** :Involved in the implementation of above mentioned functionalities.

**Project Name** : **UBM SSO.**

**Team Size** :3

**Technical Environment** :Drupal 6.x, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :This project is a development project and involves implementation of Single Sign On feature for Drupal 6 site, based on remote SSO database using PHP CURL.

**Responsibilities** :Involved in the implementation of above mentioned functionalities.

**Project Name** : **ELC.**

**Team Size** :3

**Technical Environment** :Drupal 7.x, Perl, HTML, JavaScript, AJAX, jQuery, CSS.

**Project Description** :This project is an enhancement ecommerce project with huge architecture and involves implementation of various features for ecommerce sites such as loyalty, based on Perl Backend and Drupal Front End.

**Responsibilities** :Involved in the implementation of above mentioned functionalities.

**Project Name** : **Veolia Water Technologies.**

**Team Size** :15

**Technical Environment** :Drupal 8.x, AWS S3, SNS, Dynamo DB, SQS, Gmail SMTP, Multi-lingual, HTML, JavaScript, AJAX, jQuery, CSS, Github, Drush and Composer, Web Service & APIs, CRON.

**Project Description** :AQUAVISTA is a customer portal on Veolia Water Technologies. VWT has global customers such as organizations, governments across the world that treats water. It installed hardware that treats water and the hardware has IoTs that send data on regular basis to cloud. AQUAVISTA portal displays live data from IoTs using web services. This also monitors data from IoT data and trigger alarm emails to the customers in form of mail, SMS and Voice calls. Data are pulled on cron on daily basis from latis/sales team. Data are displayed in the form of graphs, charts along with Excel export and import features.

**Responsibilities** :Team lead involved in the development of all features with custom theme, custom modules, design, estimations, client calls/requirements gathering etc.
