Educational Qualification:

B.Tech in Computer Science & Engineering

Intermediate with Physics, Chemistry, Mathematics

High School with Science

Work Experience:

Projects done in NIIT Technologies:

Drupal 8 Projects in banking domain for SEI

- **Project Name: AMD**

Description: These are part of the asset management unit of SEI Company (<https://seic.com>). We are using multi-site structure (same code but different databases.). There are 7 more sites using the same codebase.

- **Project Name: Portfolio Generation**

Description: This is developed to automate seic's portfolio generation process. They gather information from their clients and using their response they provide them investment solutions. Previously they were using an editable pdf file for this process and lots of paperwork was involved.

- **Project Name: Internal Site to See Various Reports.**

Description: SEI is gathering investment records from their various banking/advisor clients and storing them into MSSQL database. We were requested to display such data using Drupal8. So we developed this website drupal8 as the front end and we developed backend data provider using express.js and consumed the data into the Drupal.

- **Project Name: Internal Site for Advisor On-boarding.**

Description: SEI had a process for public/private advisor to be onboarding. We automated this process using drupal8 application. We consumed CRM services to develop this website. It is not public.

Joomla Projects:

- **Project Name: Alaska Magazine**

Description: This is a company site offering web services. It is an upgrade from 2.5 to joomla 3.x. We have added different components and modules as per the need. Technology included Html, Core PHP, Joomla framework and MySQL.

- **Project Name: Equistat**

Description: This is a company site offering web services. It is an upgrade from 2.5 to Joomla 3.x. We have added different components and modules as per the need. Technology included Html, Core PHP, Joomla framework and MySQL.

- **Project Name: FlyTyer**

Description: This is a company site offering web services. It is an upgrade from 2.5 to joomla 3.x. We have added different components and modules as per the need. Technology included Html, Core Php, Joomla framework and MySQL.

- **Project Name: Equine Journal**

Description: This is a company site offering web services. It is an upgrade from 2.5 to joomla 3.x. We have added different components and modules as per the need. Technology included Html, Core Php, Joomla framework and MySQL.

- **Project Name: NBHA**

Description: This is a company site offering web services. It is an upgrade from 2.5 to joomla 3.x. We have added different components and modules as per the need. Technology included Html, Core Php, Joomla framework and MySQL.

Migrated Drupal6 websites to Drupal-7 and providing maintenance:
