

.NET Developer with 5 Years of Experience

Professional Overview:

- 5years of Experience in Software Development using C#.Net/Asp.Net/ MVC WITH KENDO UI/CLOUD/ENTITY FRAMEWORK/MVVM /HTML/CSS/Jquery/SQL Server 2008/12/ORACLE.
- Working knowledge on .Net framework 3.5, 4.0 and 4.5.
- Thorough knowledge in implementation of OOPS concepts.
- Working knowledge on JQuery,HTML,CSS.
- Strong expertise in developing user-friendly web interfaces using HTML, ASP.Net .
- Good knowledge in developing applications based on frameworks such as .NET, WCF,WEB API
- Good knowledge in developing applications based on MVC WITH KENDO UI IN CLOUD, ENTITY FRAMEWORK, MVVM, LINQ, Google API, Payment gateway
- Exposure to exception handling, collections.
- Strong interpersonal and excellent communication skills.

Technical Skills/ Knowledge :

- Programming Language: C#.,C++
- Markup languages: HTML 4.0,CSS.
- Scripting Language: JQuery.
- DBMS/RDBMS: MSSQL Server,ORACLE 10g,MS access.
- Web Technologies: Asp .Net.
- Service Technologies: ADO. Net.,Entity framework,LINQ
- Third party tools: TELERIK CONTROL , KENDO UI
- Distributed Technologies: Web Services, WCF,WEB API
- Servers: SQL Server 2008/2012.IIS
- Frameworks/Architectures: MS .Net, MVC with Kendo ui and HTML helper
- Operating System: Windows XP, Window 7, Wind

Professional Qualification:

MCA (Master of Computer Application)

Project Profile:

Rice Mill Management System:

Project Name Rice Mill Management System

Technology C#.net,sql server

Platform C#.net windows application

Role Developer

Project Description This is a window based application for Rice Mills. The complete workflow of rice mills can be managed by this application.

Responsibilities To form designing,also coding.with unit testing

Accounting Systems:

Project Name Accounting Systems

Technology C#.Net, SQL Server

Role Developer

Project Description This product developed the Accounting System in windows platform which can be used in small, medium as well as large enterprises.

Responsibilities designing and coding

Warehouse Management System:

Project Name Warehouse Management System

Technology C#.net,SQL Server

Platform windows

Role Software Developer

Project Description This application is developed using Microsoft Technologies in windows platform to manage the activities at different warehouse.

Travel Management System

Project Name Travel Management System

Technology C#.net

Platform windows

Role Software Developer

Project Description This application is developed specially for the use to maintain the activities at the Travel Agencies in windows platform.

School Management System

Project Name School Management System

Technology C#.net,SQL server

Platform Windows

Role Software Developer

Project Description This is application is for Schools to manage the whole activities like Students and staff as well as other activities.

Responsibilities designing, coding.

HR Management System

Project Name HR Management System

Technology C#.net,SQL server.

Platform Windows

Role Software Developer

Project Description This is a desktop application which is based on windows platform in which the whole HR activities can be computerised.

Hospital Management System(continuing Application)

Project Name Hospital Management System

Technology C#.net,SQL server,Reporting

Platform Windows

Role Software Developer

Project Description This is application is for Nursing home to manage the whole activities like Patient Management, doctors activities,medicine stock,purchase,sale,Account management and staff as well as other activities.

Responsibilities Coding,and development.

Web Application

Project Name Steel Co.

Technology Asp.net,HTML,Jquery,SQL server

Platform Widows

Role Software Developer

Project Description This site is developed using Web technologies. But there is the web application installed on this site to manage their in-house system.

Responsibilities: designing, coding. I have implemented asp.net,ajax jquery,sql server,Html,Css ,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Web Application

Project Name Shadi Mubarak

Technology Asp.net,Jquery,Sql server.

Role Software Developer

Type Modification

Project Description This is a matrimonial site developed using Web technology like Asp.net,Jquery,Sql server.

Responsibilities Responsibilities include Modification of this website.

I have implemented asp.net,ajax jquery,sql server,Html,Css ,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Web Application

Project Name Kritibidhana Agro.

Technology PHP,MY sql,HTML,Jquery

Role Designer

Project Description This is a power tiller idler site To Manage their Work,developed using Web technology like PHP,MY SQL.HTML,JQUERY

Responsibilities Responsibilities include Designing of this website.

Web Application

Project Name Eureka Non-Woven

Technology ASP.net,HTML,JQUERY.

Role Designer

Project Description This is a bags and Fabric Rolls site To get their Information, developed using Web technology like ASP.net.HTML,JQUERY.

Responsibilities Responsibilities include Designing of this website,and upload in Server

Web Application

Project Name Phuket Baby Rental

Technology Asp.net,Jquery,Sql server.

Role Software Developer

Type Modification

Project Description This is a Children Equipment Rental site in Thailand. developed using Web technology like Asp.net,Jquery,Sql server.

Responsibilities Responsibilities include Modification of this website.

I have implemented asp.net,ajax jquery,sql server,Html,Css ,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Web Application

Project Name design solutions world wide

Technology Asp.net,Jquery,Sql server.,entity framework

Role Software Developer

Type Development

Project Description This is a Real Estate Architecture site in Odisha. developed using Web technology like Asp.net,Jquery,Sql server with entity framework.

Responsibility include Development of this website.

I have implemented asp.net,ajax jquery,sql server,Html,Css ,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Web Application (ERP Solution)

Project Name An ERP product (CRM,HRMS,FMS,IMS)(continuing till date not launched)

Technology MVC with kendo ui,entity framework,jquery ,sql server,cloud computing(Azure)

Role Software Developer

Type development

Project Description This is an ERP project which will be managed 15+ types of management system

That is also continuing still now.

Responsibilities Responsibilities include developments of various modules.

I have implemented asp.net,ajax jquery,sql server,Html,Css,WCF Service Duplex contract,Entity framework in this project also implemented trigger,cruiser,procedure in sql server. All so implemented Kendo Ui with MVC,and Telerik Ui in Asp.Net.

Also working with share point interaction .

Web Application

Project Name Human Resource Management System(HRMS)

Technology ASP Dot Net,C#.NET,SQL SERVER

Role Software Developer

Type development

Project Description This is an HRMS project which is already developed but the modification work is going on till date.

Responsibilities Responsibilities include developments of various modules.
I have implemented asp.net,ajax jquery,sql server,Html,Css ,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Ongoing Web Application And Web API

Project Name NeelPlast PVC Pipes Manufacturers
Technology ASP Dot Net,C#.NET,SQL SERVER,
Role Software Developer.
Type Web application development
Project Description This is a Pipes Manufacturer company project which is developed by me and two other team members, also Continue still date
Responsibilities Responsibilities include development of various modules like master, order ,sale, transection ,user tracking in google maps,security,report,approval,data migration . And making WEB API 2 for android mobile App.
I have implemented asp.net,ajax jquery,sql server,Html,Css,Web API,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Ongoing Web Application

Project Name Transport Management System
Technology MVC,c#.net,sql Server,Jquery,Ajax,Json implementation
Role Software Developer
Type development
Project Description This is a transport management system project which includes complete functionality of a transport.
Responsibilities Responsibilities include development of various modules like Loading, Consignment .Accounts,Security also.
I have implemented asp.net MVC,ajax jquery,sql server,Html,Css ,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Web Application And Web API

Project Name Atlas PVC Pipes and fittings marketing system
Technology ASP Dot Net,C#.NET,SQL SERVER,
Role Software Developer
Type development
Project Description This is a Pipes Manufacturer company project which is developed by me and two other team members, also Continue still date

Responsibilities Responsibilities include development of various modules like master, order ,sale, transection ,user tracking in google maps,security,report,approval,data migration . And making WEB API version (API 2) for android mobile App.. Payment, tracking the salesman in Google map(with Google API).

I have implemented asp.net,ajax jquery,sql server,Html,Css,Web API,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Web Application And Web API

Project Name Damco America

Technology ASP Dot Net,C#.NET,SQL SERVER,MVC

Role Software Developer

Type development

Project Description This is a Logistic company project in the US which is developed by ESSPL and it is still continue to give support and enhancement also

Responsibilities Responsibilities include developments of various modules . And making WEB API version (API 2) for android mobile App.

I have implemented asp.net,ajax jquery,sql server,Html,Css,Web API,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.

Ongoing Web Application And Web API

Project Name British Petroleum (BP)

Technology ASP Dot Net,C#.NET,Azure DevApps,SQL SERVER,MVC,ORACLE 12C, JQuery

Role Sr. Project Engineer.

Project Description This is Energy suppliers company project in the US which is developed by WIPRO LIMITED and it is still continue to give support and enhancement also

Responsibilities Responsibilities include developments of various modules . And making WEB API version (API 2) for android mobile App.

I have implemented asp.net,MVC,ajax jquery,sql server,Html,Css,Web API,Entity framework in this project also implemented trigger,cruiser,procedure in sql server.
